PROGRAM: **Micropiles: Applications and Techniques**
Presented by: Mr. Pat Carr, P.E., President, Judy Company

Mr. Patrick Carr from The Judy Company, Inc. will give a presentation on micropile applications and construction techniques. Micropiles are small diameter, high capacity piles that can be installed in limited access or when difficult drilling conditions are encountered. The power point presentation will show typical applications, construction techniques and give some design guidelines.

Pat Carr, P.E. has 25 years experience in geotechnical construction and is the president of the The Judy Company. The Judy Company, founded in 1922, is based in Kansas City and works throughout the central states.
